

2024 DSE (B)

香港考試及評核局
HONG KONG EXAMINATIONS AND ASSESSMENT AUTHORITY

香港中學文憑考試
HONG KONG DIPLOMA OF SECONDARY EDUCATION EXAMINATION

答題簿 ANSWER BOOK

考生須知

- (一) 宣布開考後，考生須首先在第 1 頁之適當位置填寫考生編號，並在第 1、3、5 及 7 頁之適當位置貼上電腦條碼。
- (二) 每題(非指分題)必須另起新頁作答，並須在每一頁的相應試題編號方格填畫「X」號，以表示選答的題號(見下例)，並在第一頁之適當位置填寫作答的試題編號。
- (三) 紙張兩面均應使用，並應每行書寫。不可在各頁邊界以外位置書寫。寫於邊界以外的答案，將不予評閱。
- (四) 如有需要，可要求派發方格紙及補充答題紙。每一紙張均須填寫考生編號、填畫試題編號方格、貼上電腦條碼，並用繩縛於簿內。
- (五) 試場主任宣布停筆後，考生不會獲得額外時間貼上電腦條碼及填畫試題編號方格。

INSTRUCTIONS

- (1) After the announcement of the start of the examination, you should first write your Candidate Number in the space provided on Page 1 and stick barcode labels in the spaces provided on Pages 1, 3, 5 and 7.
- (2) Start each question (not part of a question) on a new page. Put 'X' in the corresponding question number box on each page to indicate the appropriate question number (see the example below), and write the question number(s) of the question(s) attempted in the space provided on Page 1.
- (3) Write on both sides using each line. Do not write in the margins. Answers written in the margins will not be marked.
- (4) Graph paper and supplementary answer sheets will be supplied on request. Write your Candidate Number, mark the question number box and stick a barcode label on each sheet, and fasten them with string INSIDE this book.
- (5) No extra time will be given to candidates for sticking on the barcode labels or filling in the question number boxes after the 'Time is up' announcement.

(ai) fault mountain

(a ii)

(a iii) At convergent plate boundary, South American Plate and Nazca Plate move toward each other under compressional force. The denser plate Nazca Plate subducted into the ~~asthenosphere~~ ^{as the} ~~asthenosphere~~. Further under, there is a great pressure and make the rock break. There are line of weakness under the plate boundary and when there is a lot of energy inside the asthenosphere, the seismic exceed and make the plate boundary shake. A earthquake is formed. After that, the plate shake and make the sea bed become more pressure. So the sea water had become shake too and in the end, it become tsunamis.

Start each question on a new page.

(b) Refer to figure 2b. Country Y is near to the plate boundary. So when the Nazca plate and South American plate move towards each other, it will make the South American Plate shrink. And when the Nazca plate subducted into the ~~asthenosphere~~ ^{lithosphere}, a tsunami is formed. Also the major city in 2010 is in front of the epicentre, so the total death toll is become larger. Because the time of occurrence is in night, all the people sleep and they don't know there is a tsunami. The highest wave height of tsunami is 29 m, and the major city in country Y is coastal region so the tsunami will damage the house in country Y and make more people death.

(c) Yes, refer to table 2d. the government have make a conducted larger-scale earthquake and tsunami evacuation drills regularly. So when there is a tsunami, the people can know it quickly and run to the earthquake-resistant building standards. Also, the government increased the speed of the real-time data transmission of tsunami buoy sensors and the number of regional tsunami monitoring station. the people can hear the siren and run to a safe place and ready the safe

a) It is the headquarters of in MDC (more ~~development~~ developed country). The manufacturing of the smart phone will give to different kind of LDC (low ~~development~~ developed country) to make. All the labour in the industrial landscape have high knowlage.

(b) There is boston innovation district (with over 300 technology companies). So the company in there can exchange their information and skill and also they can transport the things together so they can use less cost for the transport. There is a international airport so company X can send their product to different country for sell and recive the manufacturing from the LDC. There are many highway so company X is easy to transport things to different place and use less transport fee for transport. Also there is many university with outstanding engineering and science faculties so company X can invite many university student to come to their company for work because they have high literacy rate so they can create more new product for company X. Also there are sea in front of company because it is in a coastal area, so they can put the

things into the water and cool down.

ed) The population in India is higher than The U.S. (In4d) and the population with tertiary education in India is lower than The U.S.. So the people in India do not have many skill to make the high technology product. The GDP per capita (USD) in The U.S. is higher than India because The U.S. is MDC and India is LDC. The average hourly wages in manufacturing sector (USD) in India is low but is high in The U.S. So the company will give the high-tech product to US and the low-tech product to India. The government policy since 2018 in India have refined labour and protection laws and reduced corporate tax rate from 35% to 21%. So there are different components are produced in different countries. Also, the people in India do not have money for study university, so their literacy is low and cannot do the high technology product. So company X should not relocate the assembling process back to the US. Also refer to 4c, the component manufacturing and the assembling process are in different country because all the literacy rate are different in

different country. So their manufacturing to make are also different.

(c) Refer to 4c, the component manufacturing to make are all MDC and the assembling process to make is LDC. It is because all of them have different kind of literacy rate so the product that they make are not same. Also, the share of sales revenue are different because the people in MDC had study university but the people in LDC do not have money for study university. So their literacy rate are not same. Also, the LDC only do the assembling process so their sales revenue are less than the MDC. Therefore there are different components are produced in different countries.

(ci) Planetary wind X is monsoon wind. The warm air and the cold air will meet each other because of the earth wind direction. In summer, the wind in 0° will go from North-West and 23.5°N will come from South-West from sea.

(cii) City Q is at Northern-Hemisphere. The annual range of temperature is high in City Q because the temperature is very different in summer and winter. The summer in City Q is May to October and winter is November to April. City Q is close to 23.5°N and it is in a inland area. There are monsoon in Q in July because it is the time to change season. The monsoon will make in City Q because there are wind move from South-West from sea to land. Therefore, there are relative importance of monsoon wind in affecting the temperature of City Q in July.

The global pressure belts is from high to low in summer and low to high in winter. There is a high pressure in atmosphere and when the sun have short wave radiation, it will refult to long wave radiation back to the atmosphere. In 30°N / S, there are hot weather because of the high pressure. And in 90°N / S, there are cold weather in there because of the low pressure. Also, In 30°N / S, there are typhoon because the hot air and the cold air met each other and also the high pressure and low pressure met each other. When there are great pressure, there will have heavy rain for a while.

HONG KONG DIPLOMA OF SECONDARY EDUCATION EXAMINATION

答題簿 ANSWER BOOK

考生須知

- (一) 宣布開考後，考生須首先在第 1 頁之適當位置填寫考生編號，並在第 1、3、5 及 7 頁之適當位置貼上電腦條碼。
- (二) 每題(非指分題)必須另起新頁作答，並須在每一頁的相應試題編號方格填畫「X」號，以表示選答的題號(見下例)，並在第一頁之適當位置填寫作答的試題編號。
- (三) 紙張兩面均應使用，並應每行書寫。不可在各頁邊界以外位置書寫。寫於邊界以外的答案，將不予評閱。
- (四) 如有需要，可要求派發方格紙及補充答題紙。每一紙張均須填寫考生編號、填畫試題編號方格、貼上電腦條碼，並用繩縛於簿內。
- (五) 試場主任宣布停筆後，考生不會獲得額外時間貼上電腦條碼及填畫試題編號方格。

INSTRUCTIONS

- (1) After the announcement of the start of the examination, you should first write your Candidate Number in the space provided on Page 1 and stick barcode labels in the spaces provided on Pages 1, 3, 5 and 7.
- (2) Start each question (not part of a question) on a new page. Put 'X' in the corresponding question number box on each page to indicate the appropriate question number (see the example below), and write the question number(s) of the question(s) attempted in the space provided on Page 1.
- (3) Write on both sides using each line. Do not write in the margins. Answers written in the margins will not be marked.
- (4) Graph paper and supplementary answer sheets will be supplied on request. Write your Candidate Number, mark the question number box and stick a barcode label on each sheet, and fasten them with string INSIDE this book.
- (5) No extra time will be given to candidates for sticking on the barcode labels or filling in the question number boxes after the 'Time is up' announcement.

例 Example:

(iii). There has epicentre in country Y fore year of occurrence. Therefore, when Nazca Plate and South American Plate convergences, the earthquakes occurs through two plates' friction. Also, country Y is belong to the tectonic landform X. It is easy to occur earthquakes. When earthquakes occur, tsunamis then occurs by the fractuaction of the sea. When the sea level is higher than normal, it may occur tsunamis.

(b). The tsunami-related death toll are 156. Since the time of occurrence of tsunami is 3:34 am (local time), the time which people are sleeping and they are not ready to get out the buildings. The magnitude is 8.8 therefore there is a higher strength of tsunami, people cannot overcome the tectonic hazard easily. The highest wave height of tsunami is 29 m. With the major cities are near the coastal area in country Y, increase the amount of people cannot leave under the heigest wave height of tsunami. The depth of focus is 35 km. It is the highest depth of focus in these years.

5(a)(i).

The percentage of the area of deforestation of the Brazilian Amazon increased from 2012 to 2020.

(ii). According to figure 5b, the number of cattle and the amount of beef exports increased from 2012 to 2020. People employing nomadic herding and they could remove away the dense vegetation and leave the grass only. Also, they earn money by beef exports. So that there is a big demand for deforestation by feeding livestock extensively.

(b)(i).

For short term: People need to slash-and-burn the forest for cattle ranching. But this event highly damage the soil. The soil change to be infertile when the soil exposed and erosion by wind. The vegetation cannot easy to regrow. The resources of growing crops and cattle ranching are worse.

For long term: There are many livestock in area.

The soil will compacted when the livestock usually walk around the area. The compacted soil is infertile.

The regrowing grasses is less for livestock to eat. People cannot export the beef to earn money.

Physical constraints:

For the climate, Southern California is hot in summer and warm and wet in winter. The evaporation is high in summer so the crops not growing well (irrigation needed). In winter, there will have frost-free day. The harvest maybe failed.

For the region, the soil is infertiled in Southern California since there is the centre valley.

For the river, Southern California has the river resources though the melting ice of the retreated ice land. But it need the pumping system to reach the water resources.

alleviate physical constraints:

For building a dam, it can sum up the water resources.

The weather is hot and warm in Southern California therefore the water conservation measure can effectively overcome the insufficient of the water.

Answers written in the margins will not be marked.

For the equatorial, the air expands and converges through the hot atmosphere. The low-pressure belt formed. There is part of the air sinks and diverges to the earth surface through the cool atmosphere on the tropical lows. The high-pressure belt formed. Some part of air diverges to the subtropical high, the air expands and converges again to form low-pressure belt. The polar is cold and the air sinks and diverges again to form high-pressure belt.

The region rainfall will formed through hot and wet weather. Therefore region rainfall will occur in low-pressure belt ^(30°N/S). When the weather is hot and wet, the water evaporation rate increased. The air expands and converges to form the heavy cloud in onshore. When the condensation of water is higher the cloud holding capacity, there is a rainfall. On the other hands, the air sinks and diverges in the high pressure belt (90°N/S). The distribution pattern of precipitation in high pressure belt regions are low.
