

INTRODUCTION

To enhance understanding of the standards of the HKDSE Examination, authentic samples of candidates' scripts in the 2019 examination are selected to form this set of exemplars which serve to illustrate the typical performance standards at different levels.

There are two papers in the Compulsory Part. This set of exemplars is selected from candidates' scripts of the written conventional paper. Paper 2 comprises multiple-choice (MC) questions. As candidates' MC responses cannot well illustrate the performance standards, exemplars have not been selected from this paper.

It is advisable to read this set of exemplars together with the question papers and the marking scheme in order to understand the requirements of the questions and the marking criteria. The question papers and the marking scheme are published in the *2019 HKDSE Question Papers (with marking schemes and comments on candidates' performance)*.
