

Super:

Benefits of Onscreen Marking

OSM has a number of advantages

After the examination,
the entire script is electronically scanned

Super:

Deliver the answer scripts to the Scanning Centre

Save the scanned copies of the answer scripts

Store the scanned scripts in a secure database

The resulting image is stored in a secure database,
before being delivered to markers via a secured intranet
Answer scripts can be readily allocated to different markers

Super:

Provide over a thousand workstations for OSM

Deliver the answer scripts to markers via the OSM system

Markers can also be assigned to mark the answers to a particular question

The system allows real-time monitoring of
marking progress and marking consistency

Super:

Real-time Monitoring of Marking Progress

Super:

Higher Efficiency in Mark Calculation

The system automatically records and calculates marks
thus reducing the chance for human error

The system can also supply various data on individual questions
for research and analysis on candidates' performance

Super:

More Data on Individual Questions Available
