

2020 Hong Kong Diploma of Secondary Education Examination (HKDSE) Contingency and Precautionary Measures at Examination Centres (Updated on 9 April 2020)

The HKEAA is implementing a series of contingency and precautionary measures, based on the recommendations of the Centre for Health Protection (CHP), during the examination to ensure the health and well-being of candidates, examination personnel and all involved in the administration of the examinations. Candidates should pay attention to the following important points when taking the examinations:

Before leaving for the centre

1. Candidates must check their body temperature, complete and sign the 'Candidate's Declaration Form on Health' on each examination day. The declaration forms (one form per day) have been distributed to candidates together with the admission form. **[Note: The declaration form has been updated according to paragraph 3 below but candidates should continue using the hardcopy forms distributed to them in March.]** Candidates making false, incomplete or misleading declaration may receive penalty or even be disqualified from the Examination.
2. According to the advice of the Department of Health, candidates with the following conditions should **not** go to the examination centre but consult a doctor promptly:
 - (1) Fever (body temperature at or higher than 38°C), regardless of the presence of acute respiratory tract infection symptoms such as cough or shortness of breath;
 - (2) No fever but with the presence of acute respiratory tract infection symptoms.
3. Candidates are required to declare that they are not undergoing mandatory quarantine on the day of examination; otherwise they should **not** go to the examination centre.
4. No supplementary examination will be arranged for written or practical papers. Candidates who cannot attend any written or practical examinations due to illness should follow the instructions given in [Section D4 of the 'Handbook for Candidates'](#) which had been uploaded on the HKEAA website in December 2019.
5. Candidates are reminded to take their body temperature on each day, and bring their completed 'Candidate's Health Declaration Form' and surgical mask(s) to the examination centre. **[Note: Sufficient surgical masks (one per examination day) have been distributed to school candidates via their school and private candidates.]**

Before the examination

6. Schools should maintain good indoor ventilation and environment clean and disinfected. The CHP has issued health advice (including personal hygiene, maintaining environment clean and hygiene, etc.) to schools for the prevention of Coronavirus disease (COVID-19) (Interim). For details, please refer to the relevant website:
www.chp.gov.hk/files/pdf/advice_to_school_on_prevention_of_nid_eng.pdf
7. The majority of centre schools will set up body temperature screening at the entrance of the examination centres. Before entering the written examination centre, candidates must put on their own surgical mask properly (with the nose, mouth and chin fully covered) and rub their hands by using alcohol sanitizer-gel of their own or placed in front of the entrance. Invigilators will check on the spot whether candidates have completed and signed the 'Candidate's Declaration Form on Health', and they will take the body temperature of those candidates whose body temperature is at or higher than the alert level of the screening system with a forehead thermometer and then an ear-type thermometer. If necessary, candidates may rest a while before re-taking their body temperature. The reading of the ear-type thermometer should be taken as final. Candidates who have fever will be required to leave the examination centre and consult a doctor promptly. The above procedure will be strictly enforced by the centre staff.
8. The examination procedures will commence after completion of the aforementioned steps and the start of examination may be delayed. In this regard, the HKEAA have enlisted schools' assistance to admit candidates earlier **from 7:50 am** for examinations due to start at 8:30 am. Candidates who have completed the procedures of body temperature taking and health declaration should be allowed to enter the examination hall/room unless there are designated waiting areas for the candidates. If necessary, the Centre Supervisors may exercise their discretion to postpone the start of examination by 15 minutes for the 1st examination session and 30 minutes for the 2nd examination session. However, it should be noted that on 29 April and 5 May where the English Language and Chinese Language Listening and Integrated Skills are examined respectively, the radio broadcast of the examination content cannot be delayed and will start at 10:00 am sharp. In order to ensure that the listening component of the language subjects will proceed smoothly and as scheduled, candidates must strictly abide by the requirements in points 1 to 3 above and report to the examination centre on time, **by 8:30 am**.

During the examination

9. According to the advice from the CHP, spatial separation of seating arrangement should be adopted in hall and classroom centres for written examinations. The Education Bureau also announced that schools will continue to suspend classes until further notice. Schools would optimise the use of their school premises in a bid to space out candidates in the examination centres as far as practicable. Therefore, there might be slight variation in the distance between candidates which depends on the physical setting of the examination venues. Candidates may be relocated to examination rooms other than the ones specified on their admission form. For Listening examinations, candidates being assigned to centres using infrared transmission (IR) system or PA system (for Chinese Language (Putonghua)) may be relocated to classrooms

where PA system or other device will be used for playing the recording. In this connection, they should check the latest seating arrangement when they arrive at the examination centre.

10. In written examinations, candidates are required to put on a surgical mask properly. Those who refuse to put on their surgical mask will be regarded as having breached the examination regulations. Invigilators may wear latex gloves during the distribution of question papers, attendance taking and collection of answer scripts. Invigilators may ask candidates to remove their surgical mask temporarily during the taking of attendance in order to verify their identities. In case any candidates would like to be exempted from wearing surgical mask during the examinations, they should apply to the HKEAA with medical proof or acceptable reasons on/before 13 March 2020 for further arrangement.
11. Candidates with serious sneezing/persistent coughing may be arranged to sit at the reserved seats of the examination hall or another examination room in order to minimise disturbance to other candidates. Candidates who need surgical mask may ask for help from the centre staff.

During the sessional break

12. Candidates should put on their surgical mask properly and should not talk with others during the sessional break. They should go to the open areas (and should avoid going to the crowded areas) designated by the centre school as far as possible. Schools are advised to make available their toilets as many as possible on various floors for use by candidates and invigilation staff during the sessional break. Schools should pay attention to the gender distribution of the candidates being allocated to the centre on individual examination days.
13. To prevent crowding of candidates during the sessional break, candidates should be arranged to leave the examination room or go to the toilet in batches. Candidates should space out while queuing up outside toilets to prevent overcrowding.
14. Candidates have the duty of keeping the centre school premises clean, particularly when using the toilets. Schools are reminded to supply/refill liquid handwash and clean the toilets regularly. They should disable the use of hand dryers (if any) and should not use air blowers for drying the floor inside toilets. If possible, schools may assign their janitors or cleansing staff to station in the toilets to carry out rapid cleaning during the sessional break. Please put up a notice to remind candidates that they should put the toilet lid down after use before flushing. In addition, schools with drinking fountains should discontinue the provision of such facility in the school premises. Schools should put up suitable notices/posters to remind candidates to observe personal hygiene e.g. wearing a surgical mask, washing hands with soap regularly, maintaining social distancing during the sessional break, etc. Sample notices/posters will be provided by the HKEAA to examination centres for reference.

After the examination

15. At the end of the examination, candidates should follow the instructions of Centre Supervisor in leaving the examination centre in batches, so as not to crowd the exits.
16. Schools should clean and disinfect the examination centre facilities daily before each examination day by using 1:99 diluted household bleach (or 70% alcohol for metal).

Confirmed cases of Coronavirus disease (COVID-19) during examination period

17. According to the advice of the CHP, if any candidate or invigilation staff who has stayed in the examination centre is subsequently confirmed to have COVID-19, the centre school should disinfect all potentially contaminated surfaces or items by using 1:49 diluted household bleach (mixing 1 part of household bleach containing 5.25% sodium hypochlorite with 49 parts of water). If there is blood, secretions, vomitus or excreta spillage, disinfect with 1:4 diluted household bleach (mixing 1 part of household bleach containing 5.25% sodium hypochlorite with 4 parts of water), wipe from the outside inward, leave for 10 minutes, rinse with water and wipe dry afterwards. The centre school should arrange their cleansing staff to wear appropriate personal protective equipment (PPE) including surgical mask, latex gloves, disposable gown, eye protection (goggles/ face shield) and cap (optional). After completing cleansing and disinfection, the examination centre can be used for another examination.

Points to note for household members of confinees

18. The Department of Health issues 14-day compulsory quarantine orders to all persons (except exempted persons) who have travelled outside Hong Kong. For household members of confinees, there is no requirement of compulsory quarantine. However, household members of confinees are advised to take heed of measures including avoiding going to crowded places, wearing a surgical mask when taking public transport or staying in crowded places, maintaining good personal hygiene, etc. Details can be found at CHP website: www.coronavirus.gov.hk/pdf/Points_to_note_for_household_members.pdf
